

Call 811 Before You Dig

You can call 811 or www.texas811.org. Remember to call before you begin any project requiring digging. Contact 811 at least two (2) working days before you begin excavation. They will need to know what is being done, as well as all necessary instructions to make sure the right area gets marked.

You will be given a reference number that serves as proof of your call. They will also keep a complete record of your call to verify your compliance with the law. Facility operators will mark their underground lines, as they deem necessary, and you will be able to work safely without delay.

The City of Lake Jackson Utility Department will locate your city water and sewer lines from the meter to the street. Remember, know what's below and call before you dig. If you have any questions, call the Utility Department at (979) 415-2433 or Public Works Department at (979) 415-2430.
